REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art discloses or teaches a bicycle shift mechanism comprising a housing; an opening configured to receive a control cable; and a closure covering said opening. However, the prior art shift mechanism do not disclose or teach the closure having an extension insertable through said opening or having an extension, a thickened portion, a recess, an upper lip, and a lower lip. The prior art also discloses or teaches elastomeric closures comprising an extension; a thickened portion; a molded recess; an upper lip; and a lower lip wherein said upper lip and lower lip engage edges of openings which said respective closures cover. However, the extensions of the prior art closures are not insertable through the respective openings and attachable to the interior of the housing and the prior art closures are configured to seal against the extension, i.e., not configured to seal against a housing in which the opening is formed. Finally, the prior art disclose and teaches a cover (US Patent No. 1,923,481 to Ford) for a meter box having an extension insertable into an opening in a box body. However, the Ford reference is non-analogous art and does not disclose or teach said cover being made from elastomeric material. Accordingly, it would not have been obvious to one of ordinary skill in the art to combine the disclosures and teachings of the prior art to meet the limitations of the claims; any combination of the disclosures and teachings would require impermissible hindsight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
